

MEMORANDUM

TO: Bob Kuntz, City Administrator

FROM: Chris Conway, Director of Parks and Recreation

DATE: May 7, 2019

SUBJECT: Vlasis Park Fountain

Staff is recommending the replacement of the fountain at Vlasis. We would like to replace it with a fountain similar to the one at the lake in Seven Trails. This fountain has a larger spray pattern which is illuminated at night. These features would enhance the aesthetics of the new government center and the park. The new fountain would also have a wind control feature which would prevent overspray on windy days. The existing fountain could be moved to the golf course to replace that failing fountain. Furthermore, it is important to circulate the water in each of these lakes for the health of the lake and to keep the scum and algae at bay, further enhancing the aesthetics water features.

Three price quotes were obtained for similar fountains. However the fountain at Seven Trails has a spray pattern that best suites the Vlasis Park Pond. Therefore, this particular quote of \$11,371 is the one I recommend.

If you need any further information please let me know.
