RE: Golf Pond Dredging

Department/Program: Parks and Recreation/Ballwin Golf Course

Recommendation:

Award Contract to Energy Resources for dredging pond at the golf course. Energy Resources' bid is under budget of \$70,000 and the lowest bid. All three reference calls came back favorable.

Explanation:

The pond at the golf course was last dredged over 20 years ago. Years of silt have built up on the bottom of the pond reducing the depth from approximately 8 feet to 24 inches. Shallow water warms in the summer months creating an environment ideal for algae growth. The algae growth and sediment are unsightly, has a bad odor, and causes the pond's fountain to clog and subsequently fail.
