EXPLANATION: Ammunition is used for training, bi-annual qualification of officers for firearms assigned to them and/or personally owned off-duty firearms authorized by department policy, and issuing of replacement duty ammunition. Use of Force incidents carry the highest liability risk next to motor vehicle operations requiring the highest level of training and qualification standards. Extensive testing by the Firearms Training Unit has proven the Federal Cartridge Company produces a product that is superior in accuracy, reliability and quality control. Retail businesses have been contacted and are unable to meet the Missouri State bid price, nor can guarantee availability or quantity. Less-Lethal munitions are not included with this consent request.
