

Staff Report

Subject: SLAB AND SIDEWALKS REPLACEMENT

Department/Program: STREETS AND SIDEWALKS

Recommendation: We recommend amending this unit price contract to the low bidder, M&H Concrete Contractors, Inc. Not to exceed \$700,000.

Explanation: The 2019 budget provides for street slab, curb and gutter, and sidewalk replacement, and upgrading of curb ramps to current ADA standards.

After milling Sweetwood court & lane, the pavement beneath the asphalt was in poor condition. We then determined the best course of action would be to replace the curb and gutter with fresh concrete and asphalt the center instead of an overlay. With favorable prices and timing of the contractor schedule this repair will be more cost effective and provide for a better street moving forward.

We would use the difference in the low bid from the budgeted amount of \$643,950.00 and an additional \$35,000 budgeted in house already to cover the cost of the concrete on Sweetwood. Total estimated cost is \$70,000 for the concrete work.

The table below summarizes the bids received on April 12, 2019.

	TOTAL BID
<i>M&H Concrete Contractors</i>	<i>\$550,443.60</i>
JM Marschuetz Construction	\$570,477.25
E. Meier Contracting	\$752,781.84
Raineri Construction	\$715,804.50
BUDGET	\$643,950.00
